

Looking for that "wow" factor to match your branding and décor? We can customize select servers, airpots and beverage dispensers with a variety of patterns and colors. Our hydro dipping process gives new dimension and adds a unique quality to the standard stainless options of serviceware.

## What is Hydro Dipping?

Hydro dipping is a method of permanently applying printed designs to three-dimensional surfaces. Our durable hydro dipping is done locally in small batches to ensure the printed surface will stand up to commercial wear and tear. This process gives us the ability to offer you low minimums for a premium printing service on a variety of our most popular products.

Service Ideas sticks hydro dipping in three finishes: Light Wood, Dark Wood and Travertine Marble. We also have an extended line of 12 Preferred Finishes. Custom patterns are achievable upon request and with higher MOQs. Contact your Service Ideas sales representative to help design your own custom look.

### **Simple Ordering Process**

- Step 1 Product Selection
- Step 2 Pattern/Color Selection
- Step 3 Quantity Selection

### **Custom Creation Process**

Custom patterns are achievable by selecting a base color and a pattern. Showing effect of GRAY WOOD GRAIN pattern on various base colors:
