## Acaciaaware™ and Sustainability

Acaciaaware™ is responsibly forested with care. "Responsibly forested" means that our wood is harvested in an environmentally friendly and sustainable manner.

### Sustainability means:

- Harvesting rates and clearing sizes do not exceed a forest's natural capacity to regenerate.
- Maintaining natural forest conditions needed for wildlife and healthy ecosystems to function.
- Protecting and maintaining rare, threatened, and endangered species and forest types.
- Not clearing forests or replacing them with barren tree plantations.
- Minimizing or eliminating chemical use.
- Protecting streams and rivers from soil erosion that degrades water quality and fish habitats.
- Helping workers, communities, and indigenous people benefit from the forestry operation, and protecting their rights and interests.

### Why Acaciaaware™?

Acaciaaware™ is handcrafted. Bowls are hand turned from one solid piece of acacia hardwood. Acaciaaware™ has been sold to retail stores, caterers and restaurants in the United States for over two decades. The hard grain of Acaciaaware™ repels penetration by liquids without picking up stains or odors. Each bowl and serving piece has a food-safe and water-resistant finish, which has been rigorously tested and exceeds all California Proposition 65 requirements. Acaciaaware™ can handle moderate heat but cannot withstand hot pans or baking dishes taken directly from the oven. Acaciaaware™ is not microwave safe.

**Acaciaaware™ is easy care!** Simply wash the item with warm soapy water and air dry. If your acacia wood appetizer tray and serving plate ever appears dry, treat it with 100% pure mineral oil and the grain will be restored to its original beautiful condition.

### We Minimize Our Carbon Footprint By Using Clean Recycled Packing Material

In our own warehouse, we recycle clean shipping boxes through a special machine imported from Germany. The machine shreds cardboard into a soft webbing that is used as packing material to keep our products safe in their journey from our warehouse in Southern California.

- **Each holds \$3000+** retail dollars in merchandise.
- **Gives a home for Acaciaaware™ and Placemats.**

# Woods From France Culinary Tools

14"W x 14"L x 12"H

## FREE Flower Box Display With Purchase!

Each tool has the word FRANCE stamped into the handle denoting quality. These culinary tools are authentic and hand-crafted. The display box has an incredibly small footprint while holding up to \$2500 at retail. Display takes up a small footprint and organizes the tools for easy reorders. GREAT IMPULSE ITEM!

### Why Use Wooden Spoons Versus Metal Or Plastic Polymer?

- Wooden utensils will not scratch non-stick, stainless steel or copper pans.
- Wooden utensils can stir thick mixtures without breaking and can scrape the bottom of pans.
- You can leave wooden spoons in the pot and they won't melt or get too hot to handle.
- It's wood! This means that the utensils are natural, not plastic and look nice in the kitchen.
