

## Why Pacific Merchants?

AcaciaWare™ and GoodWoods™ are responsibly forested with care. Responsibly forested means that our wood is harvested in an environmentally friendly and sustainable manner. We also sponsor and support tree replanting.

## What Does Sustainability Mean?

- Harvesting rates and clearing sizes that do not exceed a forest's natural capacity to regenerate.
- Maintaining the natural forest conditions needed for wildlife and healthy ecosystems to function.
- Protecting and maintaining endangered species, plants, and rare forest types.
- No clearing of forests with slash and burn or replacing them with barren tree plantations.
- Helping workers, communities, and Indigenous people benefit from the forestry operation, and protecting their rights and interests. Free medical exams, school lunch programs and college scholarships are among the ways we give back to the local communities.

## Why AcaciaWare™ ?

- AcaciaWare™ is handcrafted, hand turned from one solid piece of hardwood.
- Acacia trees grow up to 3 feet per year and can regrow 2-3 times during their lifetime, making them one of the most sustainable and renewable tree varieties.
- The hard grain of acacia resists penetration by liquids without picking up stains or odors.
- AcaciaWare™ is easy care! Simply wash the item with warm soapy water and air dry.

## We Minimize Our Carbon Footprint Through Recycling.

We re-purpose used shipping boxes by shredding the cardboard into durable webbing and use it as packing material. The cardboard is often used a third time by our customers for their own shipping needs.
