THE ESTABLISHMENT

LA FONDAZIONE

On the table of the first Italians from the very beginning. Sambonet began serving the homes of the Piedmontese people when united Italy was being born. In 1856 Giuseppe Sambonet, the son of a nobleman from Vercelli -after graduating from Fine Arts- obtained his warrant as Master Goldsmith. Depositing his seal bearing the initials "GS" at the Turin mint, he established the company "Giuseppe Sambonet", which by the early 1900s, soon became the official supplier to many nobles, including the Duchess of Genoa and the Count of Turin.

Sulla tavola dei primi italiani fin dall'inizio. Sambonet ha iniziato a servire le case dei Piemontesi proprio negli anni in cui nasceva l'Italia unita. Era il 1856 quando Giuseppe Sambonet, figlio di un nobiluomo di Vercelli - dopo il diploma di Belle Arti - ottenne il brevetto di Maestro Orefice. Depositando presso la zecca di Torino il punzone con le iniziali "GS" costituì la ditta Giuseppe Sambonet che già dai primi del Novecento è stata fornitrice ufficiale di molti nobili, tra cui la Duchessa di Genova ed il Conte di Torino.

INDUSTRIAL INNOVATION

L'EVOLUZIONE TECNOLOGICA

In every era, Sambonet has stood out for its progressive spirit in the production field by being the first in Italy to build a galvanic plant for silver-plating to complement its own production of massive silverware. In 1938, Sambonet already started developing sophisticated industrial technologies to produce stainless steel, making its way to the silver plating process. In 1947, it started producing stainless steel knives and blades using its own technology.

In ogni epoca Sambonet si è distinta per lo spirito evolutivo della propria produzione realizzando, per prima in Italia, un impianto galvanico per l'argentatura da affiancare alla propria produzione d'argenteria massiccia. Già dal 1938, infatti, ha iniziato a mettere a punto sofisticate tecnologie industriali di lavorazione dell'acciaio inossidabile, arrivando all'argentatura dello stesso. Nel 1947 ha inoltre intrapreso, con tecnologia propria, la produzione di coltelli e lame in acciaio inox.

1956

CONQUERING THE HOTELLERIE LA CONQUISTA DELL'HOTELLERIE

Sambonet conquered the international hotel market in 1956 when -first out of 53 competitors- it won the order for the Hilton Hotel in Cairo, with a holloware line that is still in its collection today. Since then, the company's has conquered other markets and has begun supplying world-class hotels and restaurants.

Sambonet ha conquistato il mercato internazionale alberghiero nel 1956 quando – prima su 53 concorrenti – si è aggiudicata la commessa per l'Hotel Hilton al Cairo, con una linea di prodotti ancora oggi in collezione. Da qui l'ascesa dell'azienda verso altri mercati e l'inizio della grande tradizione di forniture per hotel e ristoranti stellati di tutto il mondo.

1960

THE DESIGN AGE IL DESIGN ENTRA IN AZIENDA

Starting in the early 1960s, Sambonet began a series of collaborations with the greatest masters of Italian design, first and foremost with Roberto Sambonet. He created collections and products of primary importance for the brand, such as the "Pesciera," which can still be admired today at MoMA in New York. The brand's vocation for design is still affirmed today in the work of the company's in-house Style Center as well as in the recent contributions of Italian designers Serena Confalonieri and Gianni Cinti.

A partire dai primi anni '60 Sambonet ha avviato un percorso di collaborazioni con i più grandi maestri del design italiano, primo tra tutti con Roberto Sambonet. A lui il merito di aver dato vita a collezioni di primaria importanza per il marchio, come la "Pesciera", il "Center line" e i vassoi "Linea 50", ancora oggi in collezione al MoMA di New York. La vocazione al design del brand si afferma tutt'oggi nel lavoro del Centro Stile interno all'azienda nonché nei recenti contributi dei designer italiani Serena Confalonieri e Gianni Cinti.

Green & Sustainability

SUSTAINABILITY, TRANSPARENCY AND AWARENESS ARE KEYWORDS OF OUR CORPORATE RESPONSIBILITY.

SOSTENIBILITÀ, TRASPARENZA E CONSAPEVOLEZZA SONO LE PAROLE CHIAVE DELLA NOSTRA POLITICA DI CORPORATE RESPONSIBILITY.

CLEAN ENERGY ENERGIA PULITA

In 2022 we activated the new zero-impact solar photovoltaic system, installed on the roof of our factory. More than 3,000 panels on 6,000 sqm. The plant can generate an average of 1,250 KW, equal to 30% of the company's annual needs. The plant cuts CO2 emissions into the environment consistently, the equivalent of 7,500 planted trees in 5 years. A small but significant contribution to our planet.

Nel 2022 abbiamo attivato il nuovo impianto fotovoltaico a energia solare a impatto zero, installato sulla copertura dello stabilimento. Oltre 3.000 pannelli su una superficie di 6.000 m2. L'impianto è in grado di generare mediamente 1.250 KW, ossia il 30% del fabbisogno energetico annuo dell'azienda. Lo stabilimento diminuisce così le emissioni di CO2 nell'ambiente in maniera considerevole: il corrispettivo di 7.500 alberi piantati nell'arco di soli 5 anni. Un piccolo ma significativo contributo per il nostro pianeta.

10 YEARS OF SUSTAINABILITY REPORT 10 ANNI DI BILANCIO DI SOSTENIBILITÀ

Since 2012 we have published the Sustainability Report every year, a report on our performance through numbers and achieved targets, a concrete proof of our commitment and attention to sustainable development.

Dal 2012 pubblichiamo ogni anno il Bilancio di sostenibilità, un report delle nostre performance attraverso numeri e obiettivi raggiunti, testimonianza concreta del nostro impegno e attenzione verso uno sviluppo sostenibile.

RESPONSIBLE CONSUMPTION CONSUMO RESPONSABILE

We care about our planet and that is why we set our environmental policy on a responsible consumption and the use of clean and renewable energy sources. A sustainable and respectful approach to nature and our territory.

Abbiamo a cuore il nostro pianeta e per questo abbiamo impostato la nostra politica ambientale sul consumo responsabile e sull'utilizzo di fonti energetiche pulite e rinnovabili. Un approccio sostenibile e rispettoso per la natura e il nostro territorio.

OUR EFFORTS, EVERY DAY IL NOSTRO IMPEGNO, TUTTI I GIORNI

Beside monitoring water consumption and purification systems, we use energy-efficient LED lighting elements, twilight lamps throughout the plant and controlled thermostats in every office. We have reduced paper consumption by choosing digital archiving, using recyclable materials and separate waste collection in every room. This is non-stop progress.

Oltre al monitoraggio del consumo d'acqua e sistemi di purificazione, impieghiamo elementi di illuminazione LED ad alta efficienza energetica, crepuscolari in tutto lo stabilimento e termostati controllati in ogni ufficio. Abbiamo ridotto il consumo di carta scegliendo l'archiviazione digitale, impiegando materiali riciclabili e operando la raccolta differenziata in ogni ambiente. Un miglioramento non-stop.

ITALIAN HEADQUARTERS

In 2001, in 9 months, the new headquarter between Vercelli and Novara was built, amounting to 150,000 square meters - equivalent to more than 20 football fields - of which 19,000 square meters for production. In 2004, the new warehouse was expanded to 13,000 square meters, later still to 25,000 square meters. The building - which includes one of the largest galvanic plants in Europe - meets all production and warehous requirements, as well as logistics needs. It is positioned exactly opposite the highway entrance for fast connections to the center of northern Italy.

Developed by the Frigerio Design Group, Slow Architecture is a progressive architecture, living in time and in its context. The parallelism created by the building establishes a geometric correspondence between the Po Valley and the linearity of the façade elevation, which is sensitive to the nuances of the sky and the land through an unprecedented play of colors, with a "screen" of gigantic colored pixels.

Nel 2001, in 9 mesi, viene costruito il nuovo headquarter tra Vercelli e Novara, pari a 150.000 m2 - equivalenti a oltre 20 campi da calcio - di cui 19.000 m2 di produzione. Nel 2004 viene ampliato il nuovo magazzino a 13.000 m2, successivamente ancora a 25.000 m2. Lo stabilimento - che include uno degli impianti galvanici più grandi d'Europa - risponde a tutte le esigenze di produzione e stoccaggio, oltre che di logistica, posizionato esattamente di fronte all'ingresso autostrale per rapidi collegamenti con il cuore nevralgico del Nord Italia.

Sviluppata dal Frigerio Design Group, la Slow Architecture è un'architettura progressiva, che vive nel tempo e nel contesto in cui s'inserisce. Il parallelismo creato dal nuovo edificio instaura una corrispondenza geometrica tra la Pianura Padana e la linearità del prospetto della facciata, sensibile alle sfumature del cielo e del territorio attraverso un inedito gioco cromatico, con uno "schermo" di enormi pixel colorati.

US HEADQUARTERS

In 2020, the new centralized logistics hub Sambonet Paderno in Randolph, New Jersey was opened. A key distribution hub in North America, covering over 6.000 square meters, with 40 employees, sales offices, and a state-of-the-art warehouse with more than 15.000 products.

ENERGY & GREEN CERTIFICATIONS

Sustainable development and low environmental impact. We adopt clean and renewable energy sources such as methane and electricity – as the new photovoltaic system – and resources to be returned to the environment completely intact – as in the case of the groundwater used in our factory, which is constantly analysed and monitored by our in-house laboratory.

Uno sviluppo sostenibile e impatto ambientale contenuto. Adottiamo fonti energetiche pulite e rinnovabili quali metano ed elettricità – come per il nuovo impianto fotovoltaico – e risorse da restituire all'ambiente completamente integre – come nel caso dell'acqua di falda impiegata nel nostro stabilimento, analizzata e monitorata costantemente dal nostro laboratorio interno.

We reserve the right to alter at any time the specifications stated without notice. Considering that different operations are processed manually, some slight differences between same products of different lots may be noticed. The shapes of flatware illustrated are representatives and are not to be considered as real shape.

Le misure espresse sono indicative e soggette a variazioni senza preavviso. In considerazione del fatto che la produzione è artigianale, potrebbero rilevarsi lievi differenze tra partite diverse dello stesso prodotto. Le sagome delle posate illustrate sono puramente indicative e non si riferiscono a quelle reali.

Wir behalten uns das Recht vor, die angegebenen Spezifikationen aus technischen Gründen jederzeit zu ändern. Da verschiedene Bearbeitungsschritte handwerksmäßig ausgeführt werden, könnten leichte Abweichungen bei unterschiedlichen Warenpartien des selben Produktes auftreten. Das Profil der Besteck ist nur als Informationsskizze zu verstehen. Es stellt nicht die wirklichen Profile dar.

Nous nous réservons le droit de modifier à tout moment les spécifications techniques. Car différents cycles de production sont effectués artisanalement, on pourrait remarquer de légères différences entre différents lots du même produit.

Les silhouettes des couverts sont uniquement indicatives et elles ne se réfèrent pas à la silhouette réelle des couverts.

Nos reservamos el derecho de modificar las medidas indicadas sin aviso previo. Puesto que las diferentes fases del mecanizado se efectúan con un cuidado artesanal, podrían manifestarse pequeñas diferencias entre distintos lotes del mismo artículo. electroplated nickel-silver

The absolute purity of the silver, certification requirements of the stainless steel and nickel silver are what constitute Sambonet's quality silver production. In respect to the traditional plating, the exclusive technique HSP Hard Sambonet Silverplating applied to the products, offers longer durability and resistance to the coating.

The silver plating, done entirely by Sambonet, was developed and perfected over the years thanks to a unique automated galvanic electroplating cycle.

On an international level, the department is now distinguished for size and modernity. Always in step with the times, Sambonet has stood out for its progressive spirit in the production field. It is the first in Italy to have a system capable to add to a massive silverware the electroplating process.

Already by 1938, Sambonet started developing sophisticated industrial technologies to produce stainless steel, making its way to the silver plating process. All articles are subject to a rigid manual quality check, ensuring excellent work on all finishings and adding to their top notch esthetic design.

Sambonet's silver production is made up of AISI 304 stainless steel or nickel silver, alloy made up of 66% copper, 13% nickel and 21% zinc, embellished with pure silver.

La purezza assoluta dell'argento, i requisiti certificati dell'acciaio e dell'alpacca sono alla base della qualità della produzione argentata Sambonet. Rispetto all'argentatura tradizionale, l'esclusiva tecnica HSP Hard Sambonet Silverplating applicata ai prodotti offre maggior durezza e resistenza al rivestimento.

L'argentatura realizzata internamente è stata sviluppata e finalizzata negli anni grazie a un singolare ciclo di elettrodeposizione galvanica automatizzato.

A livello internazionale il reparto si distingue oggi per dimensioni e modernità.

Al passo con i tempi in ogni epoca, Sambonet si è distinta per lo spirito evolutivo della propria produzione realizzando, per prima in Italia, un impianto capace di affiancare all'argenteria massiccia quella galvanica.

Già dal 1938, infatti, iniziò a mettere a punto sofisticate tecnologie industriali di lavorazione dell'acciaio inossidabile, arrivando all'argentatura dello stesso.

Tutti gli articoli sono soggetti a un rigido e scrupoloso controllo qualità manuale, che ne assicura l'ottima esecuzione della finitura e che concorre alla resa estetica d'altissimo pregio degli stessi.

La produzione argentata Sambonet trae origine da acciaio inox AISI 304 o alpacca, lega costituita da rame al 66%, nickel al 13% e zinco al 21%, impreziositi con argento puro.

Opera

Seven elements in different shapes, textures and colors generate a catchy scenery giving life to a new buffet concept inspired by the seven musical notes. Alternating lines, flat surfaces, solids and voids, a series of components that, thanks to different heights, lend Opera modularity and the ability to create real architectures on the table. A symphony of geometrical sceneries where the GOLD DIAMOND and ROSE GOLD DIAMOND finishes add value to the solidity of the stainless-steel and to the delicateness of its design. This special processing technique gives the stainless-steel bright shades, and, at the same time, it naturally limits scratches, masks the wear and keeps the items unchanged and shiny over the time.

Sette elementi che, tra forme, texture e colore, compongono un palcoscenico d'effetto per dar vita a un nuovo modo di concepire il buffet, ispirato alle sette note musicali. Mediante l'alternanza di linee, piani, pieni e vuoti, i supporti – disponibili in differenti altezze – aprono Opera alla modularità e alla creazione di vere e proprie architetture in tavola. Una sinfonia di scenografiche geometrie in cui la solidità dell'acciaio inox e la leggerezza del suo design vengono valorizzate dall'esclusiva finitura Diamond, proposta in color ORO e ORO ROSA. Questo speciale processo conferisce al materiale vibranti accenti luminosi e, al contempo, inibisce naturalmente la formazione di graffi, cela gli inevitabili segni di usura e preserva gli oggetti brillanti e inalterati nel tempo.

Smooth movement and transparency

The lid is equipped with a new, transparent window made of unbreakable glass that lets you see the delicacies held in the chafing dishes. The gradual closing mechanism and the special lid removal method make the whole System even more effective.

Grazie alla trasparenza del nuovo oblò in vetro temperato, i coperchi offrono visibilità alla prelibatezza dei contenuti degli scaldavivande. Il meccanismo di chiusura graduale e lo speciale metodo di rimozione dei coperchi rende ancora più performante l'intero Sistema.

CHARACTERISTICS

An exclusive pressing process and valuable raw materials grant Contour a harmonious and exclusive design.

MATERIALS

Nickel-Silver: copper 66%, nickel 13% and zinc 21% (CuNi12Zn24), stainless steel AISI 304 (EN X5Cr-Ni18-10), brass and copper.

DETAILS

Thickness varies from 1,5 to 2 mm, up to 5 mm at the points most exposed to shocks and strain. Trays' edge, made of pressed copper, is welded with Sambonet patented special process.

Welding of handles, knobs, hinges, necks and bases are handmade by silver alloy brazing.

Solid handles are made in hot pressed brass. Stainless steel is inserted into the handles to assure heat resistance.

One piece hinges are molded and the holes gauged to assure sharp work; 145° revolving covers.

The especially shaped spout ensures excellent pouring.

Linea Q

Refined, innovative and timeless design characterizes Sambonet style. This entire concept plays with square and rectangular forms made up of interchanging edges and curves. With this line, inspired by minimalism and the surfaces of stainless steel, an extension of articles are introduced using new materials like bamboo. A mixture of cornstarch, coloring, resin and bamboo fibers suitable for contact with food.

Un design raffinato, innovativo e senza tempo che connota lo stile Sambonet. L'intero concept gioca con le forme quadrate e rettangolari, caratterizzate da un alternarsi di spigoli e linee arrotondate. In questa collezione improntata al minimalismo e alla matericità conferita dall'acciaio si affianca un'estensione realizzata con nuovi materiali come il bamboo: una miscela di amido di mais, colorante, resine e fibre di bamboo, idonea al contatto con il cibo.

An exclusive collection to inspire chefs and suggest new concepts for service at the table. Stands, pliers, wine buckets and cloches: the stylistic research carried out by the Centro Stile Sambonet offers new ideas for contemporary dining, both for the display of courses and for the concept of new culinary proposals.

Una collection esclusiva per ispirare e suggerire nuovi concetti di servizio a tavola. Alzate, pinze, secchi vino e cloche: la ricerca stilistica del Centro Stile Sambonet offre nuovi spunti per la ristorazione contemporanea, sia per la fase di presentazione delle portate che per l'ideazione di nuove proposte culinarie.
